Early Insights Consultations

Contact us to learn how Early Insights consultations can support your family or practice.

Consultation Benefits

- Understand your child's unique strengths and areas where they might need additional support.
- Receive practical and personalized strategies you can use at home right away to encourage positive behaviors and development.
- Learn about available community resources and services that can benefit your child and family.

A Board Certified Behavior Analyst (BCBA) will observe your child in their natural environment (home, school, or community) to better understand their current skills, behaviors, and interactions.

You will receive detailed notes highlighting your child's strengths, areas for growth, and any emerging needs.

Based on this observation, the BCBA will provide personalized recommendations for next steps,

This consultation service is designed to provide support and guidance. It is not a replacement for a full assessment or diagnosis. Whether you're curious about your child's development, experiencing specific behavioral challenges, or simply seeking additional support, our Early Insights Consultation can provide valuable information and direction. Contact us today to learn more!

Commitment Options:

- Up to 1 hour observation: \$500
- 1+ hour observation \$750

The service is billed as private pay and does not include CPT codes.

2020 Behavior is an Out-of-Network (OON) Provider. We will provide a superbill for all services rendered.
